🚀 My Home Lab Setup

Personal network rack, self-hosted media stack & homelab experiment log.

LOCATION	RACK UNIT	MAIN OS	STATUS
Office / Reptile Room	12U Quiet Cabinet	Proxmox VE	Up & Running ⚡

📦 The Gear (Hardware Stack)

Slot	Hardware	Category	What it does
U1 - U2	24-Port Patch Panel	Cabling	Keeps Ethernet runs tidy between switches and wall drops.
U3	Cisco ASA 5506-X	Firewall	Network edge protection, external VPN & routing rules.
U4	Juniper EX2300-C-12P	Core Switch	Fanless PoE+ switch running core LAN & VLAN routing.
U5	Extreme X430-24t	Access Switch	24 extra gigabit ports for hardware tinkering & drops.
U6 - U12	Dell Precision T7910	Server Host	Dual Xeon monster running compute, storage & LXCs.
Rack	Sysracks 12U (35" Deep)	Enclosure	Soundproofed cabinet to keep fan noise low in the office.

⚡ Self-Hosted Services

Proxmox VE
Main hypervisor for spinning up LXC containers, virtual machines, and automated snapshot backups.

TrueNAS Core / SCALE
Storage hub managing ZFS pools for personal backups, raw media files, and container volumes.

Jellyfin
Local media server streaming video around the house with GPU passthrough for quick hardware transcoding.

Frigate NVR
Smart security camera recorder using local Coral AI detection for real-time motion and object alerts.

📸 Rack Layout & Build Photo

Rack Layout: Patch Panel (U1-U2) • Cisco Firewall (U3) • Juniper Switch (U4) • Extreme Switch (U5) • Dell T7910 Workstation (U6-U12)
